

ToonRobots

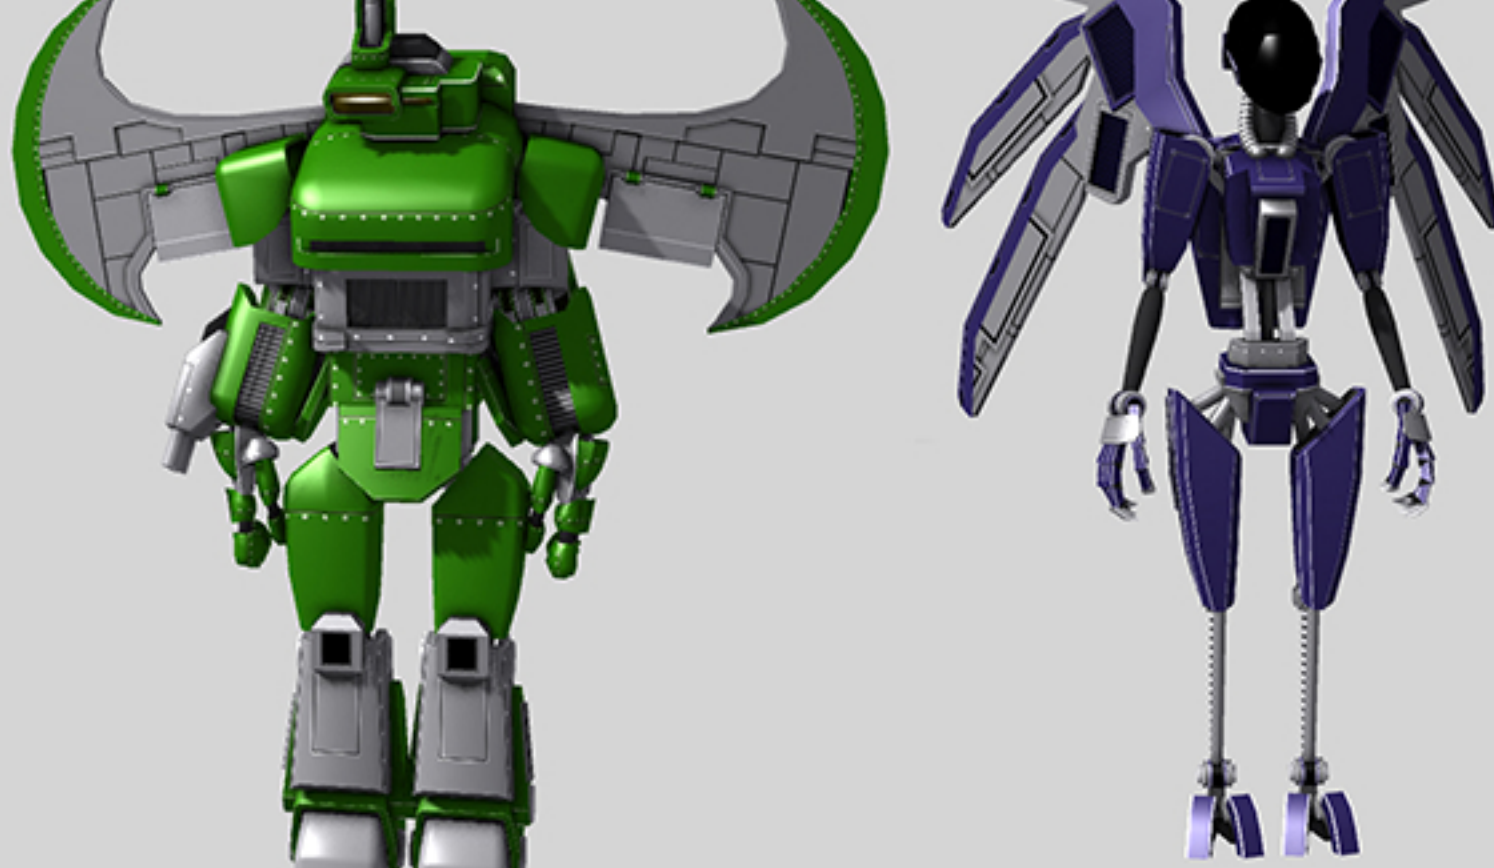

Toon robots are modular, are composed of 5 parts: face, arms, head, body and legs.

The faces are additional elements and are specific for each model.

You will find 2 model of wings in the prefabs/wings folder. You can link them as child of the TR Spine2 bone.

There are some addons in the prefabs/addons folder.

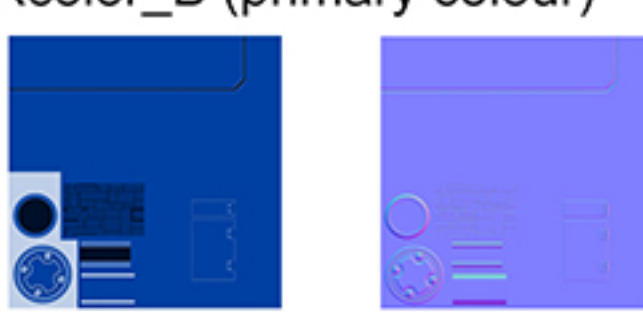

They can be used to customize any robot.

Materials

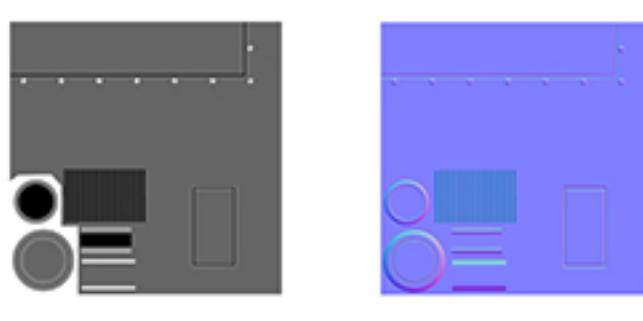

All base model uses at least 4 material.

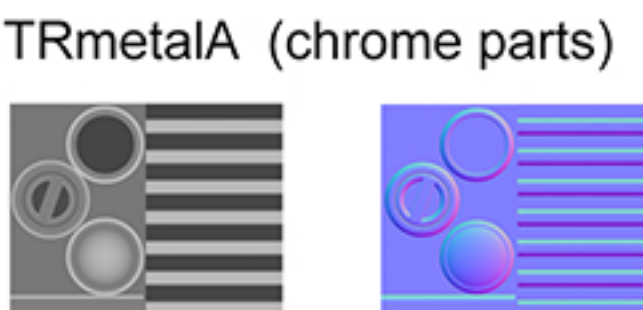

TRcolor_B (primary colour)

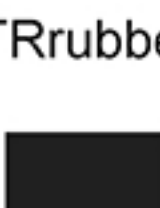

TRcolor_player (secondary colour)

TRmetalA (chrome parts)

TRrubber

As primary and/or secondary colour you can use
